Dear Gentlemen:

Per action at the May meeting of the Campbell County, Ky. Firefighters Educational Association, the association feels reconsideration is necessary relating to sections of proposed rule PR Docket No. 92-235--- replacing part 90 with part 88.

Our major concerns centered on the following items:

TIME: more time is needed to complete the process of changing from broad to narrow band systems. As a member of the Northern Ky. Firefighter's Association and working closely with many area departments from different counties, we understand that this is also their opinion as it will cause many problems due to the variety of systems in our area.

FINANCE: with many of our departments, small and solely financed through volunteer fundraising efforts, the immediate impact would definitely pose financial hardships to many of our departments. Long range planning and budgeting procedures will have to be utilized by these departments.

POWER REDUCTION: with the geographic set up of our county, a reduction in power would certainly reduce the efficiency of communications in our county. With many hills and dead spots (valleys), we are continually battling this problem in our present set up.

Thank you for your consideration in this matter and if you have any questions, please feel free to contact the Association.

Sincerely,

*Kenneth Elliott*

Kenneth Elliott, Secretary, CCFEA
